

Gilbert & Tobin Lawyers utilises ASSA ABLOY SW200 Operators to fully automate their boardroom in sophisticated style and presence.

Based in Melbourne's CBD, Gilbert + Tobin was founded in 1988 by Danny Gilbert and Tony Tobin as a small team of lawyers focused on providing excellent legal advice on high-profile, complex matters.

Project

ASSA ABLOY was presented with a unique brief. The challenge was to automate a line of ten-door panels that would move in unison whilst keeping the automation completely hidden. These doors would serve a show-stopper to clients, as well as show the innovation of Gilbert + Tobin.

The end panel had a requirement to be used a single-entry point including the ability to operate independently of the other doors when required.

Challenge

As well as being aesthetically pleasing, with no automation visible, the doors have to serve a practical purpose, and allow a large number of people quick and seamless access to and from their boardroom as well as blend in with the architectural elements of the building - all whilst moving in complete unison of each other.

SUMMARY

CUSTOMER

- Gilbert + Tobin Lawyers

INDUSTRY

- Commercial

LOCATION

- Melbourne CBD

PROJECT DETAILS

- Easy access in and out of boardroom
- Architectural style operable wall
- Seamless integration with building, requiring hidden mechanics

PRODUCT SELECTED

- 10x ASSA ABLOY SW200 Swing Door Operators

RESULTS

- Impressive architectural style
- Met design and concept brief
- Perfect symmetry
- Functional and practical solution

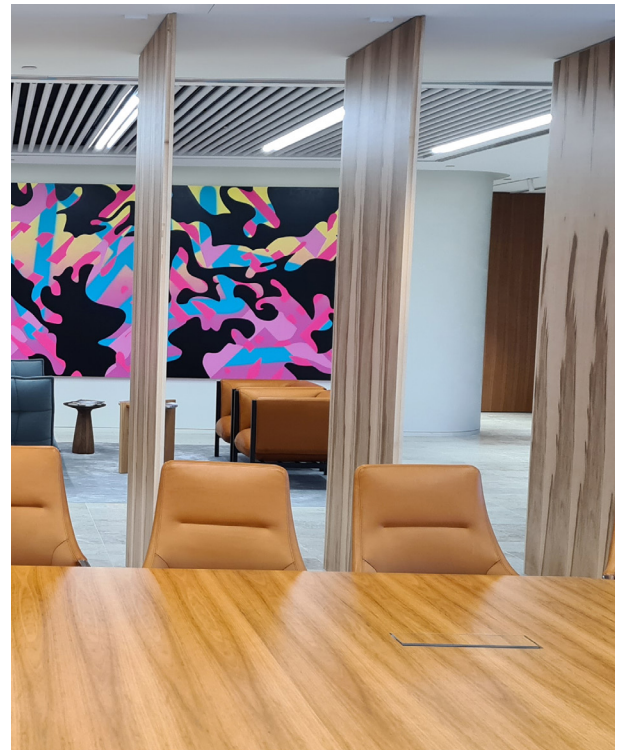

Solution

ASSA ABLOY specified, recommended, supplied, installed and commissioned ASSA ABLOY's SW200-OHC operators, with concealed pivot arms. A total of 10 doors was utilised to cover the entire length of the boardroom.

Benefits

The ASSA ABLOY SW200 with its exceptional build quality, meant that each operator could be fine-tuned to open and close at precisely the same speed. The result is a wall that seems to move as one, yet each door is completely independent of the one next to it.

The doors also achieve its essential purpose of practicality, automatic access, and with the added peace-of-mind of 24/7 customer support and maintenance.

"The ASSA ABLOY SW200 OHC is the ideal choice for applications with high demands on gentle and smooth operation in combination with strength and high traffic flow. It compensates for stack pressure and wind load and yet it remains easy to open manually."

Gilbert + Tobin's Boardroom with open SW200 doors

ASSA ABLOY Entrance Systems was able to deliver a sustainable and effective solution for Gilbert + Tobin. The project allows the peace of mind of ASSA ABLOY's 24/7 customer support, and service and maintenance packages to ensure seamless use of the system for now and into the future.
