

Service tailored to your specific needs

ASSA ABLOY
Entrance Systems

Experience a safer
and more open world

Our local service is driven by global expertise

Supporting you throughout the lifecycle of your entrance solution

A steady flow of people, goods and services through your entrances every day is a sign of a healthy business. But heavy traffic also puts your doors under pressure.

Even something as robust and well-engineered as an ASSA ABLOY automatic door needs the right care, attention and service to stay in great working order and to maximise its potential and lifecycle.

Our tailored service agreements do just that, so you can focus on running your healthy business.

With a range of optional digital solutions, we also give you access to data and insights that can further improve your performance and efficiency.

The starting point is to decide whether your agreement should focus on maintaining your entrance system, or optimising its performance throughout its lifetime. From there we can tailor your own service agreement together.

ASSA ABLOY

Maintain

ASSA ABLOY

Optimize

Ensure your entrance solution always runs smoothly

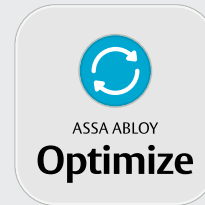

A need-based service agreement designed to increase uptime and safety of your entrance solution.

As standard, this agreement includes ASSA ABLOY maintenance services, which comprise:

- **Preventative maintenance**
- **Inspection service**

Digital solutions are optional.

ASSA ABLOY Maintain is recommended for – but not exclusive to – installations of up to 10 entrance systems.

Ensure your entrance solution always performs to its full potential

An advanced service agreement designed around preventive and corrective maintenance and digital services to keep solutions performing at their full potential.

As standard, this agreement includes:

- **Maintenance services**
- **Repair services**
- **Parts**
- **Digital solutions**

Within each of these ASSA ABLOY services, a range of service products can be added to your tailored agreement.

ASSA ABLOY Optimize is recommended for – but not exclusive to – installations of more than 10 entrance systems, or installations considered service-intensive due to frequent use and/or the high business impact of maintenance costs.
