Dock leveler ASSA ABLOY DL6020TI

ASSA ABLOY

ASSA ABLOY Entrance Systems

The global leader in door opening solutions

Energy saving telescopic lip dock leveler for cold storage facilities

Unbroken temperature chains in storage, loading and transportation are vital. In addition, big temperature differences between the inside and outside of a cold storage facility might create costly energy losses during loading and unloading. The ASSA ABLOY DL6020TI Teledock Isodock has been designed to cope with such demands. Studies made by the Institute of Thermodynamics at Hanover University show that, compared to conventional docking systems, energy savings of up to 75 percent are created.

Unlike conventional docking systems, the ASSA ABLOY DL6020TI Teledock Isodock leveler is placed behind a well insulated sectional door. In closed position it is very well sealed off from below, preventing cold or hot air access.

Besides that, the ASSA ABLOY DL6020TI Teledock Isodock is designed in such a way that impact forces from docking vehicles are absorbed by the building floor. The frostproof foundation is separated from the building floor just by a gap for housing the sectional door – not as a separate building construction. Complicated building arrangements can be avoided.

ASSA ABLOY 950 series - the intelligent, all in one, docking control system

The innovative and unique 950 series docking control system gives you direct control of the dock leveler, dock shelter and door all in one control unit. With only a few self explaining buttons it is easy to operate, to meet the demands of modern logistics. Separate steering units or complex wiring are no longer needed.

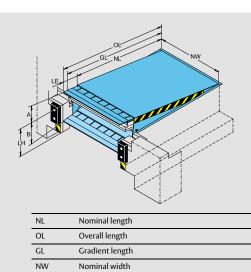

ASSA ABLOY DE6090DI Dock-IN

ASSA ABLOY Dock-IN is the world's first combined solution with parking guide and traffic lights in one system. ASSA ABLOY Dock-IN ensures a safe and secure dock in procedure with the help of white guiding lights and red traffic lights. There is no need to paint and repaint guiding lines on the asphalt or install conventional steel parking guides, which are an obstacle in the yard. With modern LED technology ASSA ABLOY Dock-IN has a low energy consumption and a long life.

Technical Data

| Nominal length | 2000, 2500, 3000 mm |
|--|-------------------------------------|
| Nominal width | 2000, 2200 mm |
| Load capacity | 60 kN (6 tonnes) |
| Vertical working range Rise above dock Fall below dock | up to 520 mm down to 460 mm |
| Platform tear-plate thickness | 8/10 mm |
| Max. point load leveler platform | 6,5 N / mm² (8 mm tear plate) |
| Insulation thickness | 40 mm |
| Lip material & length | steel or aluminium, 1000 mm |
| Lip option | tapered lip / Retracting tongues |
| Control unit protection class | IP 54 |
| Temperature range hydraulic oil | -20°C - +60°C |
| Magnetic valves | 24 V / DC 18W S1 |
| Nominal voltage | 400V 3-phase |
| Nominal motor power | 1,5 kW |
| European standard | EN 1398 Dock levelers |
| | |
