

Guarantee a reliable flow between warehouse and truck

Complete entrance solutions
for distribution and logistics

ASSA ABLOY

Ensure fast, safe and energy efficient operations

Your business relies on successful loading and unloading every day

Distribution and logistics centers need entrances which ensure safe, fast and sustainable loading and unloading at all times of day. That means trucks can come and go throughout the day and warehouses can operate around the clock. So your business can keep moving.

Whatever type of goods you deal in, whether you manage the distribution of fresh food, household goods or sensitive materials such as medicine, you need to ensure:

- Safety
- Speed and efficiency
- Temperature control
- Cost control
- Trusted supplier relationships

Meeting the operational requirements of your building and your business

During building development and construction

A new distribution center needs to meet the requirements of the people who will use it. And it needs to be sustainable and regulation ready so developers can get a good return on their investment.

Buildings in operation

When your business is moving goods, docking solutions need to make the process quick, easy and efficient. Products must be safe and simple to use so staff can operate equipment with minimal training.

Fresh food, dry boxes or sensitive materials – all types of goods benefit from fast and efficient loading and unloading

Solutions for every part of your distribution center

Loadhouses

increase energy savings

Solutions that enable loading and unloading to take place outside of your main warehouse mean you can minimize energy loss at your loading bays and maintain a comfortable indoor environment at the same time.

Restraint systems

Ensure safe operations

A range of different restraint systems can be installed at your loading bay to prevent accidental vehicle creep and premature drive off, ensuring loading operations are secured against accident and injury.

Dock shelters

Improve loading work conditions

Protect the loading and unloading process against bad weather and seal your loading bays against draughts and energy loss.

Dock levelers

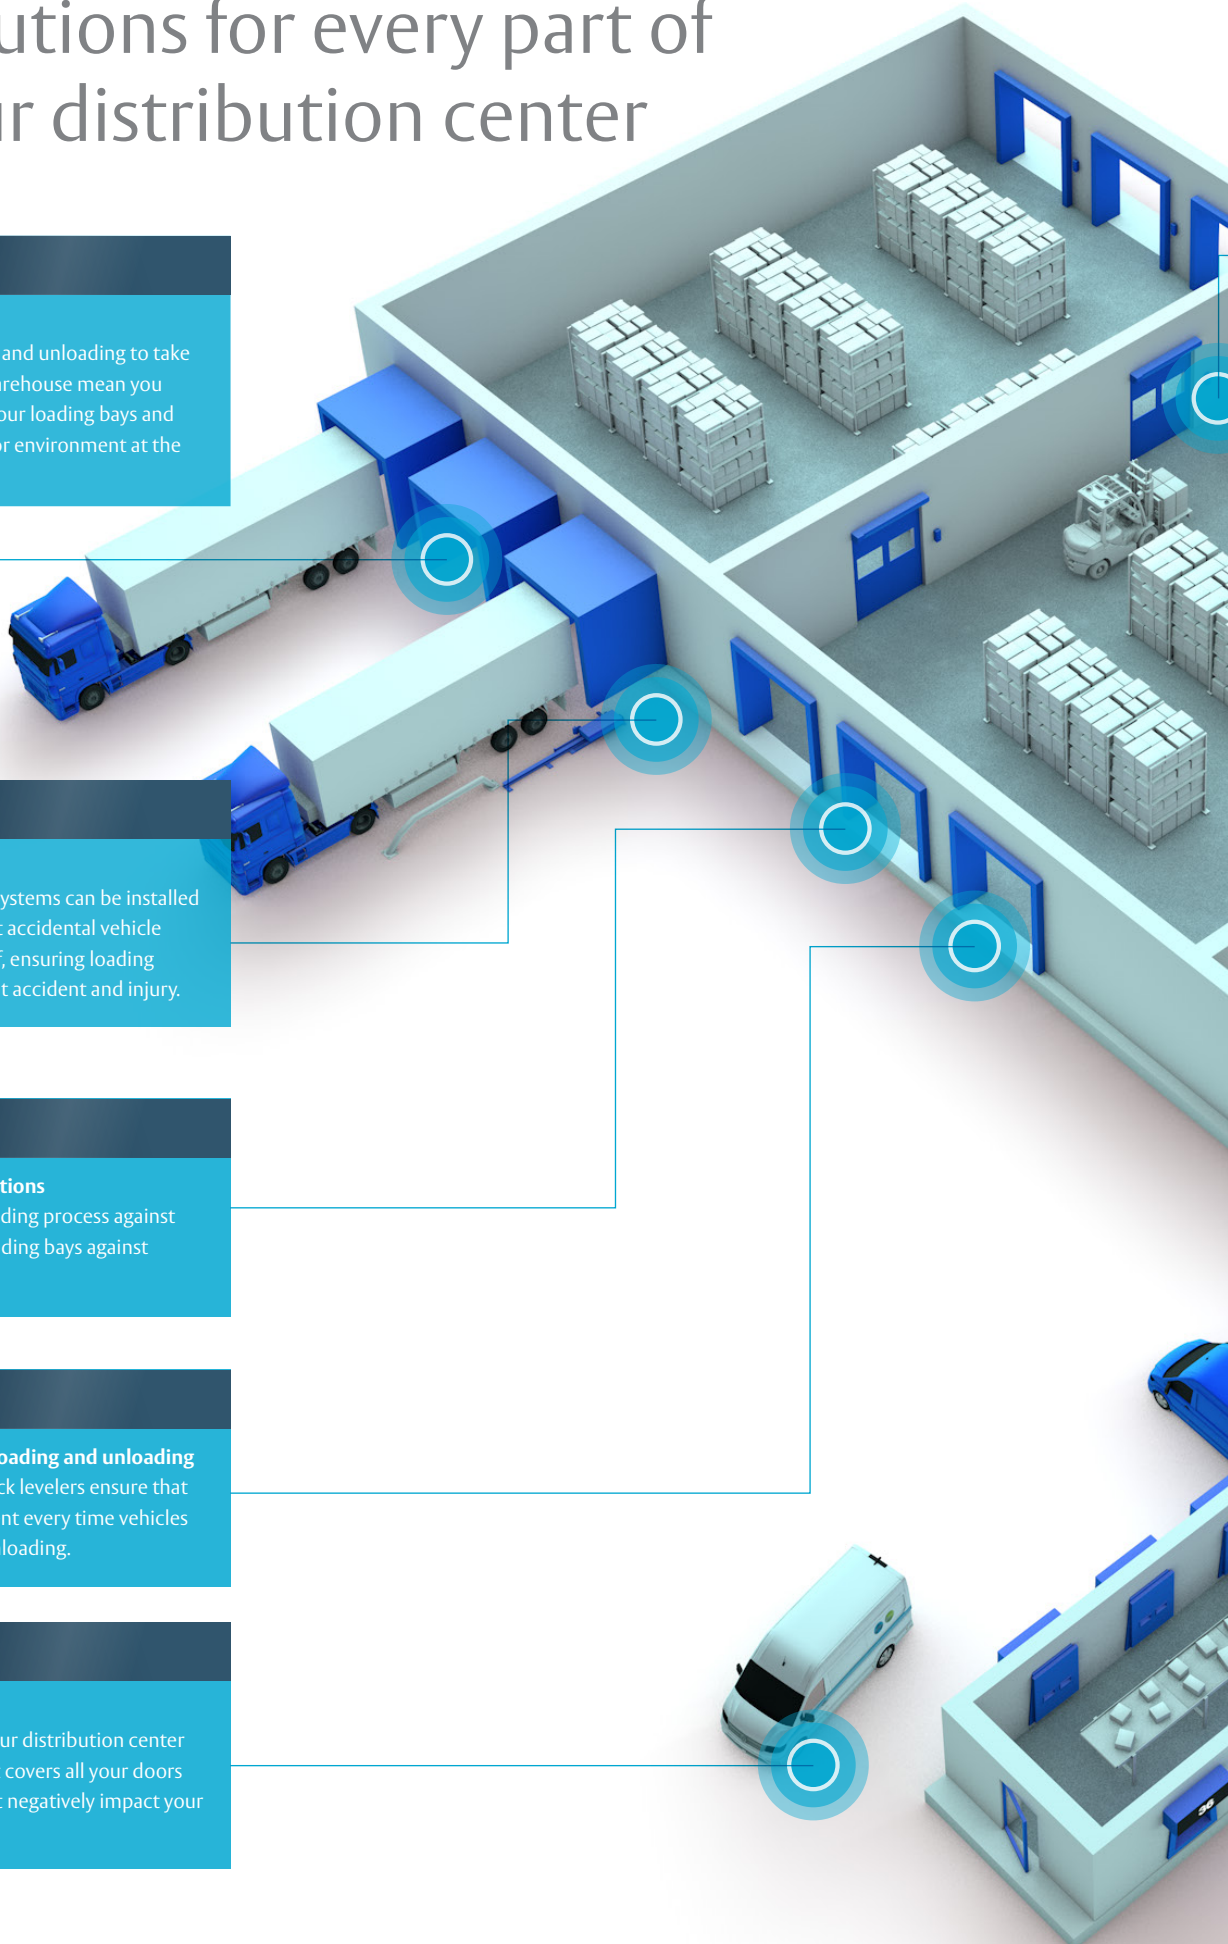

Maximize efficiency during loading and unloading

Hard-wearing and reliable dock levelers ensure that operations are safe and efficient every time vehicles are docked for loading and unloading.

Service

Minimize downtime

Maintain every entrance at your distribution center with a service agreement that covers all your doors and ensure downtime will not negatively impact your business.

High-performance doors

Keep environments separate

Ensure different environments in your distribution center are kept at the right temperature with high-speed doors that operate quickly and keep entrances well-sealed.

Industrial doors

Easy operation for greater staff efficiency

Minimize the risk of failure or operational error at your loading bays with easy to use automated industrial doors.

Control panels

Fully integrated operations

Ensure optimal safety at every loading bay with control panels that interlock and control both dock levelers and industrial overhead sectional doors. Control panels enable integration of operations throughout the distribution process.

Pedestrian doors

Hands-free staff access

Ensure staff can come and go easily and safely, and maintain a comfortable indoor environment with automatic pedestrian entrances. Sensors ensure doors only open and close when necessary, helping you keep control of temperature exchange.

Van cushion shelters

Efficiency and functionality at smaller loading bays

Designed for the loading and unloading of vans, van cushion shelters optimize parcel distribution by enhancing energy efficiency, increasing security and creating a comfortable working environment.

Entrances that bring real value to your business

A full range of hard-wearing entrances that ensure delivery excellence

Whether you are developing a new distribution center or running an existing one, the entrances on site need to work together seamlessly for your business and the people who will use them.

ASSA ABLOY Entrance Systems has a full range of solutions designed to accelerate processes throughout your entire distribution center,

from pedestrian doors to high speed entrances and docking solutions.

All ASSA ABLOY entrances are easy to operate and quick to act. They help you control different environments and minimize energy loss while also reducing costs and saving you hassle.

Covering the full life cycle of your building

Solutions for developers

If you are developing a new building, ASSA ABLOY Entrance Systems will actively help you meet your goals.

We work closely with you to provide a full range of high-quality, long-lasting products that meet your regulatory goals from sustainability through to safety. We will help you choose products that will reduce the total cost of ownership so that you can get a good return on your development investment.

Solutions for end-users

If your priority is the daily running of a distribution center, ASSA ABLOY Entrance Systems can provide you with a full range of solutions to cover your whole building.

Pedestrian doors welcome staff and visitors and keep them comfortable. High-performance doors keep processes moving. And docking solutions, including dock levelers and dock shelters, ensure loading efficiency, safety, and weather protection at your loading bays.

ASSA ABLOY teams and service technicians are usually no more than 30 minutes away, so you can be confident that when your doors need servicing, we will get you up and running again quickly.

ASSA ABLOY Entrance Systems ensure that loading and unloading is always safe, fast and sustainable

ASSA ABLOY Entrance Systems is a leading supplier of entrance automation solutions for efficient flow of goods and people. Building on the long-term success of the Besam, Crawford, Albany and Megadoor brands, we offer our solutions under the ASSA ABLOY brand. Our products and services are dedicated to satisfying end-user needs for safe, secure, convenient and sustainable operations. ASSA ABLOY Entrance Systems is a division within ASSA ABLOY.
